Released February 1964

## P R E F A C E

This summary reports unloads of fresh fruits and vegetables in Western Cities. The cities covered are indexed on page 4. Commodities reported are outlined on page 5. Group I includes products reported in daily and weekly "41 City Unload" releases indicating national supply trends. Group II lists miscellaneous fruits and vegetables, some of which were combined into general classifications to conserve space. Proportion of each item represented in these general classifications may be estimated by appropriate sampling of daily reports issued by the market being studied.

A summary table reporting 3-year comparison of unload city totals for the entire 41 U. S. and 5 Canada cities group is shown on page 7. Unloads for each city are reported in three tables as follows:

Table A - Outlines 3-year comparison by commodities and mode of transport.

Table B - Outlines city totals by months and States of origin.

Table C - Outlines detail by commodities, mode of transport, States of origin and months.

Two letter symbols identify Express (EX), Boat (BT) and rail-truck and/or piggyback (RT) unloads. These symbols appear adjacent to State of origin.

Factors used to convert truck and boat unloads to rail carlot equivalents are outlined on page 6.

Rail unloads during 1963 showed decreases compared with 1962 for most cities. These decreases for some cities were largely offset by increases in truck unloads. However, combined rail and truck unloads for the entire group showed a 1.2% decline. This was probably due to increased use of rail incentive loadings and expanded utilization of processed fruits and vegetables. Estimated percentage of completeness for truck unloads is shown at the bottom of Table A for each city.

The reports generally cover the metropolitan area of each city and attempt to include all locations where fresh fruits and vegetables are unloaded or warehoused in volume. However, the area covered in the San Francisco tables is shown at the beginning of Table A.

The fine cooperation of jobbers, carlot receivers, chain store employees and other members of the produce industry in reporting truck unloads, and railroad, express and steamship agents in reporting rail and boat unloads is appreciated. Assistance of fresh fruit and vegetable inspectors and employees of State Departments of Agriculture, Canada Department of Agriculture and farmers' markets enabled the Fruit and Vegetable Market News Service to compile and publish these reports for many cities. That assistance is hereby gratefully acknowledged.
